Altipeak™ Altitude Pod – Exterior

TRAIN IN ALTITUDE

Training in Altitude has mostly been done in a small elite environment. Altipeak Altitude POD at home has many benefits, did you know our PODs can be relocated or positioned at any sports ground. Our Altitude POD will keep you one step ahead of your competitor in what ever sport you participate and definitely have the edge on your competition.

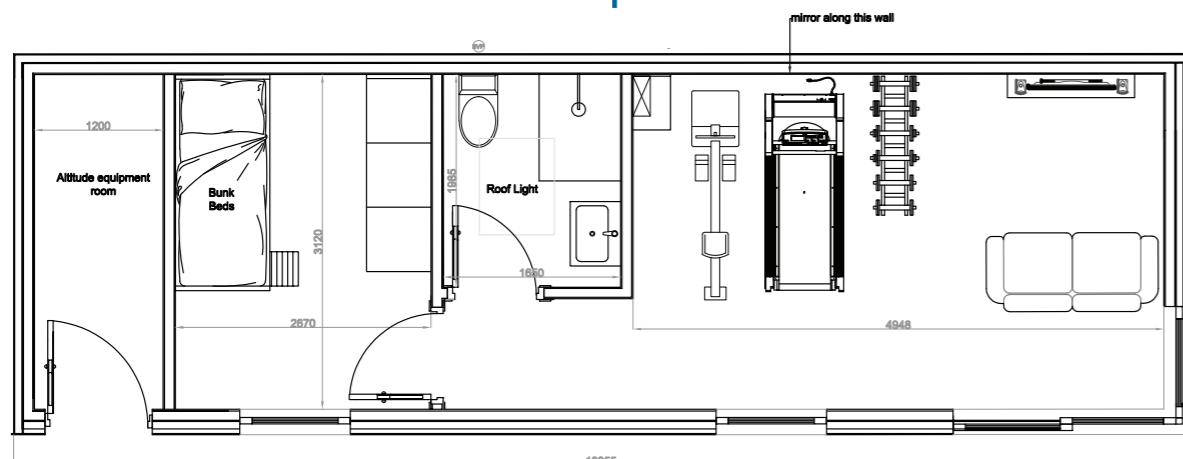

RECOVER AT ALTITUDE

Its very important to recover. Recovery in altitude can be set to 40% oxygen which has benefits to recovery, even if your looking to just chill out and acclimatize.

SLEEP AT ALTITUDE

Our Altitude PODs are ideal for sleeping in Altitude. Sleeping at Altitude has been tested by top Athletes across the world, it is well documented that by sleeping in Altitude your body will increase the amount of RBC its producing.

Small Pod Floor Plan – Sleeps 2/3

Altipeak™ Altitude Pod

Our Altitude Pods are built using MFC structural steel grade light gauge steel frames wrapped in air tightness membranes **EPS and earth-wool insulation which minimises the running costs & keeping the pod cosy all year round.** Being respectful to the earths resources is a priority for us, we have selected MFC light gauge steel frames as they are **made from 80% recycled metals.** Our Pods are permanent independent yet moveable structures.

Altipeak™ Internationals Altitude Machinery has a World Wide accreditation with CE approved & with a International Organization for Standardization 9001 certification.

We bespoke our Altitude Pods to the customers needs, with our climate control air filtration systems it can give the options for the pods to be **Hot** or **Cold**, suitable to train in Altitude any where in the world.

Now you can, **Train** in Altitude, **Sleep** in Altitude, **Recover** in Altitude, chill out and acclimatize in **Altitude**.....

PODs can be managed from a smart phone and by also using the latest technology.....

ALTITUDE PODS CAN BE TRANSPORTED WORLD-WIDE
